14.	9	
Total	100	

INSTRUCTIONS TO CANDIDATES

Use black ink or black ball-point pen. Do not use gel pen or correction fluid.

Write your name, centre number and candidate number in the spaces at the top of this page.

Answer all questions.

Write your answers in the spaces provided in this booklet. If you run out of space, use the additional page(s) at the back of the booklet, taking care to number the question(s) correctly.

INFORMATION FOR CANDIDATES

The number of marks is given in brackets at the end of each question or part-question.

You are reminded of the need for good English and orderly, clear presentation in your answers.

The use of calculators is not permitted in this examination.

The total number of marks is 100.

Some questions will require you to draw on knowledge from multiple areas of your course of study.

4. (a) Determine the missing column headings in the truth table below.

A	В			
0	0	1	1	0
0	1	0	0	0
1	0	1	0	0
1	1	0	1	1

(b) Tick (\(\strict{\lambda} \)) the correct boxes below to show the Boolean expression that represents the function described by each truth table. [1]

(i)

Inp	out	Output
P	Q	R
0	0	0
0	1	1
1	0	0
1	1	0

R	=	P	\oplus	Q	

$$R = \overline{P.Q}$$

$$R = \overline{P}.Q$$

$$R = \overline{P} + Q$$

[1]

(ii)

Inp	out	Output
X	Y	Z
0	0	1
0	1	0
1	0	0
1	1	0

$$Z = \overline{X} \cdot \overline{Y}$$

$$Z = \overline{X \oplus Y}$$

$$Z = X + Y$$

$$Z = \overline{X} + \overline{Y}$$

- 11. The storage requirements for an image can be determined by:

 - multiplying the width and height of the image, in pixels, to get the total pixel count multiplying the total pixel count by the colour depth to get the storage requirements.

Width

(a)	Write an algorithm that outputs the storage requirements in megabytes for an image. [7]
•••••	
•••••	

(b)	Expand the algorithm to output the disk space saved when a lossy compression algorithm is used and has a compression ratio of 5 : 2.	[3]

[2]

12.	The following	program is	intended to	calculate the	he area of a	circle,	but contains errors	3.
-----	---------------	------------	-------------	---------------	--------------	---------	---------------------	----

```
r is real
2 A is real
3 pi is real
4
5
 set pi = 3.14
6
7
  input r
8
9 	 if r < 0 	 then
10 A = pi * r * r
    output "Area = ", A
11
12 esle
13 output "You must enter a number greater than 0 for r."
14 end if
```

(a) Identify an example of each error in the program and suggest a possible correction.

(i) Syntax Error

		Error:	 	L	_ine:	
		Correction:	 			
	(ii)	Logical Error				[2]
		Error:	 	L	_ine:	
		Correction:	 			
(b)		pare how an interp				[2]
