Answer **either** question 4 **or** question 5.

- 4* 'Migration to Britain increased between 1250 and 1500 mainly because of changes in attitudes towards migrants.' How far do you agree with this statement? Give reasons for your answer. [18]
- 5* 'Migrants had a different impact in Britain during the period 1500 to 1750 than in Industrial Britain 1750–1900.' How far do you agree with this statement? Give reasons for your answer. [18]

- 7 Interpretations B and C both focus on the position of women in Anglo-Saxon society. How far do they differ and what might explain any differences? [12]

Interpretation B – Octavia Randolph writing in a website *englishhistoryauthors.blogspot.co.uk*. Randolph writes historical fiction set in Anglo-Saxon times about the adventures of Ceridwen, a fifteen-year-old girl.

You might be surprised to learn that if you are English, your maternal ancestors of 1000 years ago enjoyed more legal rights than did your great grandmother. Shocking, but true! Anglo-Saxon women enjoyed the right to own land. Divorce laws granted the wife half the household goods and full custody of the children. All this came to a crushing end after 1066. I tried to reflect this in my fiction. I believe I have given my female characters the appropriate rights and freedoms. I based them on law codes of the time as well as information from surviving wills. When I first wrote about Ceridwen I worried that I was giving her too much freedom in my stories, too much excitement. But after researching women in Anglo-Saxon England I wonder if I have not given her enough!

Interpretation C – An extract adapted from *The Norman Conquest* by historian Marc Morris in 2013

The notion persists that pre-Conquest England had been a much nicer place – freer, more liberal, with better rights for women. But almost all of this is myth. In the 19th and 20th centuries it was argued that before the coming of the Normans women had better legal rights, allowing them to control their own property and to have a say in whom they married. The period before 1066 was imagined as a golden age, where women and men rubbed shoulders in rough and ready equality only to be ended by the coming of the nasty Normans. However, these arguments have been comprehensively discredited. The reality is that women were no worse off under the Normans than they had been under the Anglo-Saxons; they simply had a bad time both before and after 1066.

Answer **either** question 8 **or** question 9.

- 8* In her blog *The death of Edward the Confessor and the conflicting claims to the English Crown* Dr Jessica Nelson argues that ‘Edward himself should shoulder some of the blame for the succession crisis.’ How far do you agree with this view? [20]
- 9* According to historian David Howarth in his book *1066 the Year of the Conquest*, ‘It took William five years of ruthless oppression to bring the country under his power.’ How far do you agree with this view? [20]
