General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

Question Number	Answer
<p>Q05f QWC (i-iii)</p>	<p>Indicative content for a discussion about the impact of the widespread use of the internet on the availability, accuracy and control of online information about an individual.</p> <p>Availability An organisation can learn about their candidates and employees to protect the organisation's reputation. The linked, searchable nature of online information leads to information being readily accessible. 'Digital footprint' – information is permanently recorded. Individuals can use social and specialist business networks to promote themselves or their views.</p> <p>Accuracy Others could post misleading information about an individual without them knowing. People's opinions/habits change, but an old opinion / action might still exist online.</p> <p>Control Possibility for others to share (with and without permission) leading to unintended audiences. Makes us more considerate of what we post online. Personal information should not be available to others – impacts on individuals right to privacy. Difficult to get archived/legacy data/information removed. Data Protection Act means individuals have a level of control over what data is held about them and safeguards for organisations.</p> <p>Impact (+ve / -ve) on: Employment opportunities, reputation, relationships</p>
