Explain how an increase in explosive strength may help to improve the performance of a games player.
Explain how an increase in explosive strength may help to improve the performance of a games player.

Section B

Questions based on the preliminary material

These questions are linked to the scenario which was released before the examination and which is repeated below.

Answer **all** questions in the spaces provided.

Alex is currently in his second year of studying a degree in Sport and Exercise Science at university.

At secondary school, Alex was very active and participated in a wide range of sports activities because he enjoyed them so much. His main sports were cricket and football. He represented his county in both of these sports and was also part of a leading Premier League Academy for football. Unfortunately however, he was released by the football club during year 12 due to injury, whilst studying for his A-levels. Despite recovering from his injury and playing for a local lower league team, he lost interest in the competitive side of the game. As a result, his participation in sport was minimal by the time he finished at sixth form and he put on weight.

Alex went on to study sport at university and his interest in participating was revived. In his first year, he joined the local gym and signed up for the football and athletics clubs. Now in his second year, he has been working on a strength and fitness programme using a variety of training methods specifically for football and athletics. He presently plays centre forward for the 1st XI football team and competes in the 400 m and long jump.

Alex shares a house with three other students. He finds it difficult to maintain a balanced diet needed for an active sportsman. He has taken on the role of secretary for the university football club to both widen his interests and to make him more attractive to future employers.

	Total for this question: 21 marks
18 (a)	Explain how different nutrients could help to improve Alex's performance in football and/or athletics.
	(Answer in continuous prose) [6 marks]

Extra space		

Name three administrative and management skills that Alex will require in his role as secretary of the university football club.
