GCSE – NEW
3110U10-1
GEOGRAPHY
Unit 1: Changing Physical and Human Landscapes
TUESDAY, 22 MAY 2018 – AFTERNOON
1 hour 30 minutes

ADDITIONAL MATERIALS
In addition to this paper you may use a calculator and a ruler if required.

INSTRUCTIONS TO CANDIDATES
Use black ink or black ball-point pen. Do not use gel pen. Do not use correction fluid.
Write your name, centre number and candidate number in the spaces at the top of this page.
Answer both questions in Section A.
Answer one question from Section B.
Write your answers in the spaces provided in this booklet.
If additional space is required you should use the continuation pages at the end of this booklet. The question number(s) should be clearly shown.

INFORMATION FOR CANDIDATES
The number of marks is given in brackets [ ] at the end of each question.
Your ability to communicate and organise your ideas will be assessed in questions that are worth 6 or 8 marks. The accuracy of your writing will be assessed in your answer to question 2(c)(ii).
SECTION A – CORE THEMES

Answer all of the questions in this section.

THEME 1: Landscapes and Physical Processes

1. (a) Study the OS map extract below. A full key is printed on page 28.

O.S. Map Extract of Three Cliffs Bay, South Wales at a scale of 1:25,000
(i) Give the four figure grid reference where the river reaches the sea in Three Cliffs Bay. Tick (√) the correct answer in the box below. [1]

<table>
<thead>
<tr>
<th>Grid Reference</th>
<th>Tick (√)</th>
</tr>
</thead>
<tbody>
<tr>
<td>5487</td>
<td></td>
</tr>
<tr>
<td>8753</td>
<td></td>
</tr>
<tr>
<td>5387</td>
<td></td>
</tr>
</tbody>
</table>

(ii) Give the width of Three Cliffs Bay from Great Tor to Shire Combe. Tick (√) the correct answer in the box below. [1]

<table>
<thead>
<tr>
<th>Width</th>
<th>Tick (√)</th>
</tr>
</thead>
<tbody>
<tr>
<td>0.6 km</td>
<td></td>
</tr>
<tr>
<td>1.3 km</td>
<td></td>
</tr>
<tr>
<td>2.6 km</td>
<td></td>
</tr>
<tr>
<td>5.2 km</td>
<td></td>
</tr>
</tbody>
</table>

(iii) Describe the relief (shape of the land) in box A shown on the map. Use evidence from the map. [4]

..............................................................................................................................................................................................
..............................................................................................................................................................................................
..............................................................................................................................................................................................
..............................................................................................................................................................................................
..............................................................................................................................................................................................
..............................................................................................................................................................................................
..............................................................................................................................................................................................
..............................................................................................................................................................................................
..............................................................................................................................................................................................
..............................................................................................................................................................................................
..............................................................................................................................................................................................
..............................................................................................................................................................................................
..............................................................................................................................................................................................
..............................................................................................................................................................................................
..............................................................................................................................................................................................
(b) Study the photograph below.

(i) What makes this landscape distinctive? Use evidence from the photograph. [3]

(ii) Landscapes are often affected by people. Describe one negative impact of people on a landscape you have studied. [3]

Name of landscape studied ..............................................................
(c) Study the information below.

Visitor Activities in UK National Parks

<table>
<thead>
<tr>
<th>Activity</th>
<th>% of Visitors</th>
</tr>
</thead>
<tbody>
<tr>
<td>Walking</td>
<td>40</td>
</tr>
<tr>
<td>Driving around and sightseeing by car</td>
<td>19</td>
</tr>
<tr>
<td>Relaxing</td>
<td>12</td>
</tr>
<tr>
<td>Visiting towns and villages</td>
<td>10</td>
</tr>
<tr>
<td>Other (e.g. horse riding, climbing, water sports)</td>
<td>19</td>
</tr>
</tbody>
</table>

(i) Select the most suitable graphical method of presenting the data shown in the table. Tick (√) the correct answer from the box below. [1]

<table>
<thead>
<tr>
<th>Graphical Method</th>
<th>Tick (√)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Scatter graph</td>
<td></td>
</tr>
<tr>
<td>Line graph</td>
<td></td>
</tr>
<tr>
<td>Histogram</td>
<td></td>
</tr>
<tr>
<td>Pie chart</td>
<td></td>
</tr>
</tbody>
</table>

(ii) Select one of the methods you have not chosen. State why it is unsuitable. [1]
(iii) Study the photograph below.

**Signs for visitors to Snowdonia National Park**

Evaluate **one or more** strategies for managing landscapes in Wales. [6]
(d) (i) Describe the process of hydraulic action in a river channel. [2]

(ii) Explain why geology and river processes interact to form waterfalls. You may use an annotated diagram to help your answer. [6]
2. (a) Study the population pyramids below.

United Kingdom 1950

United Kingdom 2016
(i) Give the percentage of the UK population aged 50-54 in 1950. Tick (✓) the correct answer in the box below. [1]

<table>
<thead>
<tr>
<th>Percentage</th>
<th>Tick (✓)</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.9</td>
<td></td>
</tr>
<tr>
<td>3.4</td>
<td></td>
</tr>
<tr>
<td>6.3</td>
<td></td>
</tr>
<tr>
<td>7.3</td>
<td></td>
</tr>
</tbody>
</table>

(ii) Calculate the difference in percentage of people aged 70-74 between 1950 and 2016 by completing the table. [2]

<table>
<thead>
<tr>
<th>Percentage (%) people aged 70-74 in 2016</th>
<th>4.4</th>
</tr>
</thead>
<tbody>
<tr>
<td>Percentage (%) people aged 70-74 in 1950</td>
<td></td>
</tr>
<tr>
<td>Difference</td>
<td></td>
</tr>
</tbody>
</table>

(iii) Use the population pyramids to give one other way in which the structure of the UK population has changed. [1]

____________________________________________________________________________________

(iv) Describe two ways in which an ageing population has created challenges for the UK. [4]

1. ..........................................................................................................................................................................................

____________________________________________________________________________________

2. ..........................................................................................................................................................................................
(b) Study the map below.

Distribution of urban and rural areas in Wales

Key:
- Hamlet and isolated dwellings
- Village
- Town and urban fringe
- City and town

(i) Describe the distribution of urban areas in Wales. [2]
(ii) Give the meaning of the following terms by choosing from the definitions in the box below. Write the correct letter in each box. [2]

Urban-rural continuum

Counter-urbanisation

<table>
<thead>
<tr>
<th>Letter</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>The movement of people from urban areas to live in the countryside.</td>
</tr>
<tr>
<td>B</td>
<td>The daily movement of people from the countryside to the city for work.</td>
</tr>
<tr>
<td>C</td>
<td>The area from which a large town or city attracts people to use its services.</td>
</tr>
<tr>
<td>D</td>
<td>The gradual change in settlement type from the city to the countryside.</td>
</tr>
<tr>
<td>E</td>
<td>The movement of people from the countryside to live in the city.</td>
</tr>
</tbody>
</table>

(iii) Explain why people in rural areas of Wales may have less access to services now than in the past. [6]
Give one reason why many people work in the informal economy of cities in NICs or LICs.

Study the photographs and the fact box below.

Dharavi, a slum in Mumbai, India

Homeless person in London, UK

Fact Box

- Mumbai is India’s largest city. It is estimated that around 13 million of the 21 million population live in slums without access to clean water and basic services.
- London is the capital city of the UK. It has a population of 8 million. Despite being one of the richest cities in the world, around 8,000 people are homeless and sleep rough.

“The challenges facing all global cities in the 21st century are the same.”

To what extent do you agree with this statement? Make use of evidence from the photographs and fact box.

The accuracy of your writing will be assessed in your answer to this question.
End of Question 2
THEME 3: Tectonic Landscapes and Hazards

3. (a) Study the information below. Mount Vesuvius is an active stratovolcano.

The Bay of Naples and Mount Vesuvius
(i) Describe the location of Mount Vesuvius. [2]

(ii) One feature of a stratovolcano is pyroclastic flow. Describe two other features of a stratovolcano. [4]

1. ........................................................................................................................................................................................

2. .......................................................................................................................................................................................

(iii) Explain why the people of Naples are vulnerable to the impact of pyroclastic flows. Use evidence from the photograph and map. [4]
(b) Study the information in the table below.

### The Richter scale of earthquake magnitude

<table>
<thead>
<tr>
<th>Magnitude</th>
<th>Description</th>
<th>Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.0-2.9</td>
<td>Minor generally not felt, but recorded.</td>
<td>1,300,000 per year (est.)</td>
</tr>
<tr>
<td>3.0-3.9</td>
<td>Often felt, but rarely causes damage.</td>
<td>130,000 per year (est.)</td>
</tr>
<tr>
<td>4.0-4.9</td>
<td>Noticeable shaking of indoor items, rattling noises. Significant damage unlikely.</td>
<td>13,000 per year</td>
</tr>
<tr>
<td>5.0-5.9</td>
<td>Moderate can cause major damage to poorly constructed buildings over small regions. Slight damage to well-designed buildings.</td>
<td>1,319 per year</td>
</tr>
<tr>
<td>6.0-6.9</td>
<td>Strong can cause serious damage to well-designed buildings. Destructive up to about 160 kilometres across populated areas.</td>
<td>134 per year</td>
</tr>
<tr>
<td>7.0-7.9</td>
<td>Major can cause serious damage over larger areas.</td>
<td>15 per year</td>
</tr>
<tr>
<td>8.0-8.9</td>
<td>Great can cause serious damage in areas several hundred kilometres across.</td>
<td>1 per year</td>
</tr>
<tr>
<td>9.0-9.9</td>
<td>Devastating in areas several thousand kilometres across.</td>
<td>1 per 10 years</td>
</tr>
</tbody>
</table>

(i) Describe the relationship between the magnitude of earthquakes and the frequency with which they occur. [2]

(ii) The amount of ground shaking during an earthquake increases by a factor of 10 with each point on the Richter scale. Point 4.0 on the Richter scale is 10 times more powerful than 3.0 and 100 times more than 2.0.

Calculate the increase in ground shaking during an earthquake measuring 7.0 on the Richter scale compared to one measuring 3.0. Show your working. [2]

Answer ..............................................
(iii) Explain why an earthquake with magnitude 5.5 (refer to the table on page 16) might have varying impacts on people in countries at different levels of development. [6]
(c) Study the photograph below.

Earthquake in Amatrice, Central Italy in August 2016

Suggest the social impacts of this earthquake on the people of Amatrice. Use evidence from the photograph.

End of Question 3
If you have answered Question 3 do not answer Question 4.

THEME 4: Coastal Hazards and their Management

4. Study the map and photograph below.

Relief map and location of Kingston-upon-Hull, England

Key:
- 50 m and above
- 20 - 49.9 m
- 10 - 19.9 m
- 5 - 9.9 m
- 0 - 4.9 m

Spot height (m)

Town/city

Coastal flood barrier, Kingston-upon-Hull
(a) (i) Describe the location of Kingston-upon-Hull. [2]

(ii) The coastal flood barrier in Kingston-upon-Hull is an example of hard engineering. Describe two other examples of hard engineering on the coast. [4]

Example 1 ...................................................................................................................................................................

Example 2 ...................................................................................................................................................................

(iii) Explain why Kingston-upon-Hull is vulnerable to coastal flooding. Use evidence from the map and photograph. [4]
(b) Hurricanes, or cyclones, are severe storms that affect tropical regions and cause major flooding of coastal areas due to raised sea levels called storm surges. The severity of hurricanes is measured on a scale of 1 to 5.

Study the table of information below.

<table>
<thead>
<tr>
<th>Category</th>
<th>Wind speed in km/hr</th>
<th>Storm surge height in metres</th>
<th>Damage</th>
<th>Average frequency of storms in every 10 years affecting USA</th>
</tr>
</thead>
<tbody>
<tr>
<td>5</td>
<td>249 +</td>
<td>5.7 +</td>
<td><strong>Catastrophic.</strong> Flood damage to lower floors of buildings less than 5 metres above sea level.</td>
<td>0.2</td>
</tr>
<tr>
<td>4</td>
<td>210–249</td>
<td>3.9–5.6</td>
<td><strong>Extreme.</strong> Flooding extends far inland. Major damage to buildings and structures close to shore.</td>
<td>1.2</td>
</tr>
<tr>
<td>3</td>
<td>178–209</td>
<td>2.7–3.8</td>
<td><strong>Extensive.</strong> Widespread flooding near the coast.</td>
<td>4.6</td>
</tr>
<tr>
<td>2</td>
<td>154–177</td>
<td>1.8–2.6</td>
<td><strong>Moderate.</strong> Significant flooding of roads near the coast.</td>
<td>4.7</td>
</tr>
<tr>
<td>1</td>
<td>119–153</td>
<td>1.0–1.7</td>
<td><strong>Minimal.</strong> Some shallow flooding of vulnerable homes.</td>
<td>7.1</td>
</tr>
</tbody>
</table>

(i) Describe the relationship between the severity of storms and the frequency with which they occur. [2]

(ii) Calculate how often the USA might expect to experience a Category 5 storm. Show your working. [2]

Answer ...........................................................................................................
(iii) Explain why the vulnerability of coastal communities to flooding varies in countries at different levels of economic development. [6]
(c) Study the photograph below.

Sea wall defences at Penzance, Cornwall

Suggest the social reasons why the council is prepared to spend money on maintaining the defences in Penzance. Use evidence from the photograph.

End of Question 4

END OF PAPER
<table>
<thead>
<tr>
<th>Question number</th>
<th>Additional page, if required. Write the question number(s) in the left-hand margin.</th>
</tr>

Explorer Map symbols

ROADS AND PATHS  Not necessarily rights of way

MOTORWAY
DUAL carriageway
Secondary road
Narrow road with passing places
Road under construction
Road generally more than 4 m wide
Road generally less than 4 m wide
Other road, drive or track, fenced and unstocked
Graded: steep: more than 20% (1 in 5)

Gully (V Vehicles: (P) Passenger

RAILWAYS

MULTIPLE track

SINGLE track

Narrow gauge

Light Railway: System with station

Road over: road under: level crossing

Cutting: tunnel: embankment

Station: open to passengers: siding

PUBLIC RIGHTS OF WAY  Not shown on maps of Scotland

Footpath

Bridleway

Byway open: all traffic

Road used: public path

The representation on this map of any other road, track or path is not evidence of the existence of a right of way

OTHER PUBLIC ACCESS

- Other routes with public access

The exact nature of the rights on these routes and the existence of any restrictions may be checked with the local highway authority. Agreements are based on the best information available.

National Trail/Long Distance Route

Permitted footpath

Permitted bridleway

Footpaths and bridleways along which landowners have permitted public use but which are not rights of way. The agreement may be withdrawn.
